What the whole world knows:

There is only one RED CROSS

Its mission is the same throughout the world

You gave royally in war—
Won't you give royally in peace?

Wherever a sick child is found
Wherever disaster strikes
Wherever the sick and suffering cry for help

THERE IS RED CROSS

It asks your help.

Now is the time to give.

ALSO A GOOD TWO REEL COMEDY

CLARESHOLM LOCAL NEWS

Mrs. Geo. Maxwell is a patient in the local hospital.

A. J. Lewis has purchased a new Chevrolet sedan.

H. Shori is a patient in the local hospital this week.

R. K. Pick of Edmonton spent several days in town this week.

W. S. Keeley has been down from Banff for several days this week.

A. E. McAlister and daughter Eva spent Monday and Tuesday in Calgary.

Mrs. Harry Gordon returned to her home from the hospital on Thursday.

Kenneth McMillan of Gramum returned home from the hospital home on Saturday last.

E. L. Moore has purchased the Adams residential property in the west part of town.

Mrs. Trondale was able to return to her home from the local hospital on Wednesday.

S. L. Fraser has moved his real estate office into the Reinecke building on Third avenue.

M. F. Miller of Calgary is in town this week. He has just purchased a farm near Macleod.

High wind and dust storms visited the district for several hours on Sunday, and again on Tuesday.

The Keween orchestra is billed to play for a dance in the L.O.O.F. hall here on Saturday night this week.

Lawrence Moser is in the local hospital for an operation for tonsilitis which he underwent on Wednesday.

Born, on Wednesday, October 27, to Mr. and Mrs. John Bosch, southeast of Gramum, twins—a son and a daughter.

J. Dickinson has bought the recently finished bungalow a block east of the railway station and is moving in this week.

The "Indian parade" of the School of Agriculture freshman was held on Thursday and was up to the usual standard.

Mrs. Tim Gillies is expecting her sister, Mrs. Graham of Prince Albert, Sask., the first week in November, for a visit.

F. A. Burton & Sons are at Vanshall this week selling 600 head of cattle to go to the Winnipeg or Chicago market.

Stanley Darch delivered 760 bushels of wheat in one day to the U.G.G. elevator with his Chevrolet truck on Tuesday.

N. H. Sitter sold 300 head of cattle to Butler & Co., Ltd., on Monday. They were a fine bunch of cattle, some of them going to 1400 lbs.

Mrs. R. A. Shearer underwent an operation for gall stones at the General Hospital, Calgary, on Tuesday. She is reported as progressing favorably.

Mrs. Taylor, matron of the Claresholm hospital, will teach the class in home nursing at the School of Agriculture during the fall and winter terms.

Those wishing a chicken cook-book, look for Thanksgiving dinner, come to the school sale in the L.O.O.F. hall on Saturday afternoon, November 6th.

Big game hunters will remember that under provincial regulations it is compulsory to wear white coat, white trousers and white cap when hunting.

The weather for the past week has been favorable for threshing, and much grain has come in to the elevators here. There has been a shortage of grain carriers with no immediate relief in sight.

"Man Under His Life and Time," a classic eight reel moving picture, will have a special showing at Claresholm on November 17. Admission prices will be 10¢ and 35¢.

Arrangements have been made for John Aberg to meet Al Anderson of Moose Jaw in a wrestling bout at the Rex Theater on Wednesday evening, November 3. There will be a six round boxing contest and other preliminaries.

Dr. Alexander's lectures closed off Tuesday evening. The lectures were well attended and it is believed to be of benefit to all who heard them. The Review understands that Dr. Alexander goes to Nanton from here.

Mrs. Odie Berg, who was working on the cook car of J. M. Sohy's threshing outfit, met with an accident just Saturday evening. One of the steps of the car she fell and suffered a bad fracture and dislocation of the elbow.

The Ladies Aid of St. Vincent's Catholic church, Claresholm, will give a dance in the L.O.O.F. Hall on Friday night, November 5th. Mack's Melody Makers are supplying the music. Supper will be served in the hall. All will be welcome.

"The Flame of the Yukon," with Seena Owen and Arnold Gray, will be shown at the Rex theater on Saturday evenings this week. Adapted from the story by Monte Katterjohn. There will also be a Mack Sennett comedy, "Hubby's Quiet Little Game."

Shortly after 6 o'clock on Monday evening the barn on E. S. Saman's farm four and a half miles northwest of town was discovered to be burning, and it burned to the ground in a short time. The origin of the fire is unknown. Some insurance was carried.

The harvesters who put on an entertainment at the I. O. O. F. Hall in September have arranged to put on a similar entertainment in the same hall on Monday evening next, November 1. There will be dancing, wrestling, singing, clapping, dancing, etc., and a dance after the show.

Mrs. Fred Laing entertained the Allen Players put on an excellent rendition of "So This is London" last Friday evening at the Rex theater. The players were well adapted to the characters and the situations were excellently handled. The audience was a good attendance. The company announced their intention of returning to Claresholm in another play at a later date.

The moving picture of the recent Dempsey-Tunney contest for the heavy weight championship of the world will come to the Rex theater on Saturday evening, November 22nd. This is said to be the best fight picture ever filmed. Harry Scott, editor of the sport column of the Calgary Albertan, says that seeing the picture is better than seeing the fight at the ringside.

Dr. McMillan reports a big yield of wheat from his farm east of Gramum. He harvested more than 60 bushels to the acre on 100 acres of summer fallow, and on his farm east of Claresholm wheat averaged 43 2-3 bushels to the acre on spring plowing, which is about 10 bushels to the acre for the fallow. 80 acres of summer fallow on the same farm averaged 47 bushels to the acre.

School of Agriculture opened on Thursday with an enrollment of 6 girls in the first year class, and 6 boys in the second year; seven more will come later. There are 7 girls in the British boys class, 18 more expected later. So the attendance for this year will be about 60.

Following is the story of a man, C. K. Crawford, being ruled and soon taken from him—Paul Wookin and Emil C. Kreger, two harvesters, who were in the same outfit with Crawford, were arrested at Sergeant's Island, China, and at the police court here with consuming despair in a public place. They were fined \$20 with costs or 30 days. There was not enough evidence to show that they had committed the offense. They took money from Crawford, who had just been paid \$100 for his work with a threshing gang.

EARLY COUGHS

October, with its warm days and cool nights, marks the start of the cough and cold season and foolish indeed are those who neglect these early coughs.

NYAL CREOPHOS

will relieve them promptly and build up strength for the forthcoming winter. Our advice is to fortify the system now with Creophos so you can face cold weather with assurance of good health.

Ask us about Creophos.

Mapping Spread Of Trees In The Prairie Provinces To Ascertain Rate Of Growth

Mapping the spread of trees in the prairie provinces with the object of ascertaining the rate at which they spread goes on, is one of the latest activities in which Prof. V. W. Jackson, the man in charge of Agriculture college, and other authorities are engaged.

The mapping is being done in connection with a systematic survey to map the prairie provinces with trees, than is at present the case, and yet in no way interfere with agricultural development. With the exception of comparatively narrow strips of land, where the trees have been driven and lakes, the prairies were treed up in the last century, according to Prof. Jackson, who in a statement quoted LaVerendrye, the first white man to explore the prairies, as saying with surprise at the lack of foliage on the prairies proper whereas some of the districts through which LaVerendrye passed are now practically covered with trees.

So far, the results of the mapping has been more remarkable to be noted, according to Prof. Jackson. All through Saskatchewan, "poplar" is a name and forming all the way along the roads, and it is said that the poplar grows there so rapidly new land is broken for agricultural purposes.

It is only a matter of a few generations until there will be no such thing as a treeless stretch or prairie, of any great extent.

While the poplar is easily fast in the way it adapts itself to the conditions of the prairies, satisfactory results are being obtained with ash and elm trees, which have been sent to Beaver Lodge, Alta., and Red Deer, Alta., have germinated and the saplings give promise of developing into large trees. Elm seeds which have also been planted in the prairies have been germinated, and in the case of the oaks, the progress of the oak saplings is being closely watched.

Healthy Livestock In Saskatchewan

Work in Connection With Tuberculosis Test Underway

The test in the air for the eradication of bovine tuberculosis in the six rural municipalities of Long Lake, Saskatchewan, has been completed by the Dominion Department of Agriculture and some assistance was given by the Provincial Government and the rural municipalities. The test, which involved 1,000 cattle and only 120 reactors, or less than one per cent—3 per cent to be exact, this shows that Saskatchewan live stock are in a very healthy condition, and it is believed that farmers in the western area will continue to improve the quality of their stocks by making it a pure bred sire area as well.

Effeminate Youth

Chicago Doctor Says Thymus Glands Responsible For Vigorless of Present Generation

The trouble with the "effeminate youth and manly bappers" of the present generation is that they are physically incapable of supporting their physical development, Dr. Victor H. Lindlahr, of Chicago, told the Ontario Drugless Practitioner's association in annual meeting here at Toronto. Dr. Lindlahr said that the reason these glands were operating beyond their proper period was due to the softness and laxity which the march of science and civilization installed in the lives of the average person of 1926.

Surprised When He Saw Ganda
Mr. Alfred Bishop, who came to Alberta from the United States, has written home to his friends expressing the surprise of M. O. G. Edwards, Canadian Government Agent, at 201 E. George street, Syracuse, New York. Says Mr. Bishop: "I am going to tell you what I think of the Canadian government. They are surprised to see that the wheat grown in this country is the best in Canada. This country is the land of opportunity—and there is plenty of it."

Had To Be Careful
The wife of a man sent out for a preacher to come to the bedside of her husband, who was dying, than he could be had. The preacher came and said: "You had better renounce the devil, my friend."

"Renounce the devil!" exclaimed the dying man. "Why I am not in the position to make any enemies now."

—The Outlook

History Rich With Myths

Many Famous People Believed Dead

Stories still persist concerning the appearance of famous people after their death provide an interesting number of myths that refuse to perish. Just as Lord Kitchener was supposed to be alive in Germany during the war, so General Hector Macdonald is believed to have died with exist- ence after his death.

Soon after the untimely end of this popular soldier, who rose from the ranks, it was reported he was a survivor of the general who had been captured by the Dowager Empress. The myth gathered strength as the years went by, until a returnee travelled from Poland wrote of the "lonely palace of death" where he had seen the British general dressed as a Chinaman, rever'd by all. It lives to this day.

Wellington's gigantic funeral was not sufficient to bring conviction to his death.

While the polar star of this world, the sun, is reported to be a prisoner in Ayer House, many visitors to the Metropolis would peer wonderingly at the sky in the hope of catching a glimpse of the captive "Iron Duke."

Even Wellington's death

is surrounded with many myths and legends that defy time.

Discover Missing Link

Complete Skull of Ape-Like Creature Is Found In Java

Digital anthropologists were thrilled by the discovery of Batavia, Java, and the Dutch East Indies, by the Netherlands Government Medical Museum at Leiden, at Trinil, in Central Java, a complete skull of the prehistoric apelike creature termed by the late the "Missing Link," and by the late Dr. Dubois, of Leiden, who dispatched said the skull was found at the same place where Professor Eugene Dubois, Amsterdam University, discovered in 1892 a unique human skull which he called Pithecanthropus erectus, which was reconstructed the previously unknown ape-like human being designated as the "Missing Link."

Professor Hummelink's specimen which the dispatch said is complete and sound, will be kept in Dutch East India, as exportation of such relics is prohibited.

Mrs. Mildred Tidmarsh, who has catalogued more than 6,000 skulls at the Royal College of Surgeons, believes if the reported discovery is true it is the most important in years. Dr. Dubois' famous discovery was made on April 15, 1892, in the Bedeng River, near Trinil, in Central Java, and was followed with many authorities opposing Dr. Dubois' theory. The creature was not held to bridge the entire gulf between man and the ape, but some scientists argued it constituted a further piece of evidence in that direction.

Needlessly Alarmed

British newspapermen are reporting the story of the Chinese in newspapers, which they fear are becoming more and more Americanized, and are wondering what they can do about it. They are needlessly alarmed. Canadian newspapermen are Americans, an American and to a certain extent in manners and news, but in heart they are far from American. They are nearer British in ideals than they are American—Calgary Albertan.

Looks Like Over-Production

President Angell, of Yale, said at a New Haven tea:

"The books in the Yale library double in number every 20 years. They cost \$100,000,000 to buy. New books are added, that many old books being stored away to make room for them. Books, books, books!

"Of course," he added, "all is not literature that interests."

Be Careful to Wash Your Face and Hands thoroughly — I'm expecting your Auntie!"

Be careful to wash your face and hands thoroughly — I'm expecting your Auntie!"

But suppose she doesn't come?

Making Use Of Nature

Invention Has Made Gasoline and Lighter Fuel Possible

An invention of which lumbermen know little, yet which saves their pockets to the tune of tens of thousands yearly, is the so-called sun valve which means of getting gas bunks and lighters are rendered unnecessary.

Inside a gas buoy can be stored enough acetylene gas to burn for six months. If the light can be turned on, the valve will open and the world by hand would mean the employment of hundreds of men and horses, and would often be impossible owing to bad weather.

But by means of the sun valve the sun is used to do the work. As the rays of the sun strike the valve a certain substance causes the tap to be turned so that the acetylene flame burns low. When twilight comes again the valve turns the light on again to rise again during the hours of darkness.

Soon after the untimely end of this popular soldier, who rose from the ranks, it was reported he was a survivor of the general who had been captured by the Dowager Empress. The myth gathered strength as the years went by, until a returnee travelled from Poland wrote of the "lonely palace of death" where he had seen the British general dressed as a Chinaman, rever'd by all. It lives to this day.

Wellington's gigantic funeral was not sufficient to bring conviction to his death.

While the polar star of this world,

the sun, is reported to be a prisoner in Ayer House, many visitors to the Metropolis would peer wonderingly at the sky in the hope of catching a glimpse of the captive "Iron Duke."

Even Wellington's death

is surrounded with many myths and legends that defy time.

Buoy Bees In Manitoba

Big Increase In Honey Production Reported This Year

Manitoba reports a big increase in honey production for the sixth year in succession. Honey production for the past four years has increased steadily, and in 1925, 1926, 1927, and 1928, respectively, the amount of honey produced has been 1,000,000, 1,100,000, 1,200,000, and 1,300,000 pounds.

It is but a few months ago that a story appeared in several newspapers that a monstrosity was born in Monroe. After showing himself to the public, he is reported to have revealed himself as "the who was once called 'Czar'."

History is rich with myths and

legends that defy time.

Shipping Buffalo To North

Movement of 2,000 Buffalo of Various Kinds Is Proceeding

As previously announced, the Department of the Interior is sending another shipment of buffalo from the Buffalo National park at Waterton, Alberta, to the prairie park near Fort Assiniboine, Northern Territories. This is the second movement to be made from the herd of 8,000 at Waterton, the former having been made last year when 1,624 young animals were shipped approximately 700 miles to their new home on the Peace river.

The first of this year's shipments was made from Waterton on April 29, resulting in the arrival of 1,000 animals, and these by road to a point on the Slave river a little south of Fitzgerald. This landing place is a considerable distance north of the one used last year and was selected owing to the fact that the animals were much in evidence; the Imperial heralds declared their national costume for European deers.

Parker—"Why do you call Robinson skipper?" He was a sea captain in his younger days, eh?"

Stunfield—"He was an embezzling bank cashier."

Black Bear In Alberta Lakes

Large mounted black bear may soon be a common sight in the northern batch of fanglers and roosters from the Kootenay Lakes have been placed in Lac La Nonne by the North Alberta Fish and Game Protective Association.

Roast chicken a specialty at the Sunshine Club food sale and bazaar, at the L. O. O. F. Hall on November 6th.

Morning electric light service started last Saturday, much to the convenience of the early rising portion of the community.

Good progress has been made during the past week in setting up the new engine at the power house, and in changing the street wiring system.

Arrived at Lethbridge on a charge of false pretences and brought back to Claresholm, Arthur Wong, alias W. K. Horne. Wong was accused of having failed to pay his bill of \$250.00, plus costs, or three months in default of payment, by Magistrate T. H. Stedman. According to the complainant, Harry Mederat, Wong had come to Claresholm and said he would pay him \$1000.00 to go down to the store and buy a few things as "Long Pack" was out and he could not get the money until he got back. Instead of this he left Claresholm on the night train taking everything he had with him. Restitution was made. Mederat of the ten dollars.

MARRIAGE

McLean—Laidlaw
Mr. J. Beverley McLean of Macleod, and Miss Maude M. Laidlaw of Clareholm, daughter of Mr. and Mrs. Jas. A. Laidlaw, were united in marriage at Calgary on November 6th.

Both bride and groom are well known and popular young people. Miss Laidlaw has for several years been on the staff of the Royal Bank here, and Mr. McLean has been well known here, having been for seven years on the local telephone staff. They will reside at Macleod.

They have the best wishes of a host of friends.

Fire Destroys Farm Buildings of Wilfred Gibbie

Wilfred Gibbie's farm house, east of town, caught fire a few minutes after noon on Tuesday. The very high wind that was blowing at the time made all efforts to check the blaze unsuccess-
ful. The fire spread from the tie to the barn, chicken house and a granary, which were destroyed. Some of the furniture was removed from the house but was damaged by the high wind. The house itself was saved, as was the barn, but other contents including feed, a grain tank and wagon, were destroyed. Two dozen chickens were burned to death in the chicken house. A considerable part of the grain in the granary was saved. The loss is fairly well covered by insurance.

**St. Andrew's Society of Clare-
holm District**

The annual meeting of the above society will be held in the G. W. V. A. rooms on Saturday 6th November, 1926, at 8 p.m. Business: Election of officers and other competitive business.

J. R. Watt, President.

Lack of ships at Vancouver has compelled port to put an embargo on grain from the prairies. At present, however, all cars of Alberta wheat are clearing on the sidetracks at Calgary.

Thanksgiving Day this year will fall on November 8.

**Man of 60 Helped
by Simple Mixture**

"After taking Adlerka I feel better than for years. At my age (60) it is ideal, so different from other medicines," signed W. G. Adlerka. Adlerka is a simple mixture of buckthorn bark, glycerine, etc., which removes GAS in ten minutes and often brings surprising relief to the stomach. Stops the griping pains of constipation, but old waste-matter you never thought was in your system. Excellent for chronic constipation.—Claresholm Pharmacy.

As a progressive Dairyman desiring to secure maximum profits from my milk herd, I realize the necessity of adhering to an organized schedule of care, feeding and handling.

Average Milk Production per Cow in Different Countries

COUNTRY	AVERAGE POUNDS PER COW
NETHERLANDS	1,000
SWITZERLAND	900
GERMANY	800
ENGLAND	700
UNITED STATES	600
SCANDINAVIA	500
FRANCE	400
ITALY	300

Taking measures, I have decided that good health is the most important factor in securing a large quantity of milk. I want not more cows, but ones that will produce a large quantity of milk from each cow.

Any cow in my herd that shows any signs of lameness, whether temporary or otherwise, I will immediately remove her from the herd. If she drops a tail, but otherwise appears healthy, I will keep her on my herd until some time next to me at a year old.

During the hot summer months, I shall always keep my herd with a cool stream, either in a river or a place where there may be a small waterfall. I will provide shade and ventilation on both sides of the stream, and a provider rather than a dam.

A large condition like that pictured here shall never pass me by. I will take every measure to improve her condition, and if necessary, I will sell and replace her with a younger, more active animal.

The comfort of the animal is important. The following graph was obtained by petrological examination of the blood of animals under stress during stable movement. It shows the effect of the body when turned to the right. This condition shall be part of my program. Clean animals, clean with no bacteria counts.

The growth in the number of cows testifies to the success of the methods I am using. I pledge my assistance for education, for myself and others.

During feeding, I shall always provide a balanced ration containing protein, carbohydrates, as well as a plentiful supply of pure, clean water.

When my milk is bottled I shall always seal it carefully for my own safety. I will then add more milk and more money to my pocket, and the greater the quality of the milk shall reward the land.

Indian Potentate Pays First Visit to Canada

Exhibit from India at Chateau Frontenac.—Inset: The Diwan.

DIWAN Bahadur Sir T. Vilayarnachavacharya, distinguished Indian representative, the Diwan of the Province of Madras, and Indian Legislative Assembly, and a former Prime Minister of the Cochini State of Southern India, who arrived for the first time in Canada, was received at the Pacific Hotel, Montreal, on October 26th. He opened the National Exhibition at Toronto on August 26th.

The Diwan was a picturesque figure on the streets of the various cities he visited, wearing a native Indian turban and crimson robes. He was the centre of attention on a lecture tour and visiting the Canadian Rockies. Sighting the Laurentians from a van, he said, "Surely those aren't the Rockies!" During his trip across Canada he is making a study of conditions for the benefit of his countrymen. He said, "I have found that old waste-matter you never thought was in your system was removed. Such a contraction is strictly in accordance with Indian etiquette and will be quite in order."

New Telephone Rates are Necessary

BECAUSE The old rates failed to provide any reasonable provision for depreciation or storm damage on an investment by the people of the Province of \$2,096,145.67

The old rates barely paid for operating expenses and interest charges on the investment.

The interest charges of over a million and a quarter annually are fixed and must be paid.

Operating expenses have been cut by \$100,000 per station in the last two years and can be cut no further without seriously impairing the service.

The added revenues will secure adequate protection of the investment and put the telephone utility on a sound financial basis.

With the addition of another 4% share of the increase is small and it receives dollar for dollar of his rental in good telephone service.

With adequate and fair rates, Alberta's Telephone System is well out in front in America. As a subscriber you appreciate this.

Canadian Poultry For United States

Government Certified Birds are in Demand in the U.S.

High school pupils who operate a community hatchery at Saybrook, Illinois, will use Canadian broiler-type pens next year, 348 ten week old chickens from R.O.P. dams having been shipped to these young poultrymen by the R.O.P. Breeders' Association of Canada.

The pens are in every province of Canada organizations of poultrymen who have birds entered in Canadian Record of Performance. The birds of these pens are the top quality in the country, under government supervision and official records are issued by the Canadian Government for birds which lay over 150 eggs in a year, provided that the birds are healthy, free from glandular tuberculosis and certified that the egg average over two ounces each. For birds which lay 215 eggs in a year advanced certificates are issued. These government records are issued to the poultrymen and sold through the associations and noisy sales to the United States and practically all sections of the world have been made.

Measure That Is Unreliable

Teapots Should Hold One Cup But Size Varies Greatly

"A teapot three times a day after meals with a little water?" That is about the amount of tea that a Canadian家庭 will drink. The interesting question was raised recently at the meeting of the Pharmaceutical Association as to what amount a tea pot should hold. It was said that when a druggist goes to buy tea from different sites there are in teapots. Some would hold more and some less than a drachm. Various suggestions were made at this meeting to recommend a standard. In conclusion the decision was that it was not a subject for the association, but for the manufacturers, and it was left to them. We do not suppose that in most cases a slight difference in the size of the teapots is of any real importance. It might be argued if all the medicine glasses agree in the amounts marked on them as representing so many teapots and table-spoons, and also what does a "spoonful" of anything mean? A man with a spoonful of sugar in his coffee cups—Kingston Standard.

Says It Cannot Be Done

Impossible to Shoot a Projectile to the Moon

Barbers that somebody in Moscow wants to shoot at the moon has aroused the academic criticism of Professor A. W. Ellington, the astronomer, who is director of the London Daily Mail. The order to escape the gravitation of the earth," he points out, "your projectile needs a velocity of seven miles a second." To travel from the earth to the moon necessary to carry a gramme of matter at this speed is 15,120 calories. The energy of a gram of a Krupp shell is about 100 calories. The energy of a gram of our most violent explosive, nitro-glycerine, is less than 1,500 calories. Consequently, if the explosive had nothing to carry except its own weight, it has less than 10 per cent of the energy necessary to travel to escape the earth. To reach a distance of 240,000 miles in the air, the projectile would need a thermal energy unit mass equal to 7,500 calories. Where can we get such energy? Nobody knows."

An All-Round Boy

"How is it I never can find you when I want you?" asked the office manager. "First you're in the stock room, then in the factory, then down to the receiving department, and now here you are on the roof. What's the big idea?"

"Well," answered the new office boy, "you advertised for an all-around boy—and that's me."—Chris-tian Science Monitor.

Want Gold-Plated Radios

Radio is reaching the gold-plated age. Hundreds of visitors to the Radio World's Fair at Madison Square Garden, New York, paid to pay bills for sets with gold plated sets, according to exhibitors. One exhibitor began with nickel plated sets, but the public soon demanded those finished in gold plate.

Nearly 150,000 persons in Australia are receiving government unemployment aid.

Moscow has decreed that Greeks and Italian emigres must be included in the curriculum of Italian schools.

A fool friend can hold a hammer as effectively as a bitter enemy

A Very Long And Severe Winter Promised

Washington Scientists Says It Will Last Spring

A winter which will begin early in the month of October and last until April will bring "extremely deep snows" and which will be, in fact "one of the severest ever known on the North American continent," is on its way.

Should there be, before the first of the year, a great volcanic eruption anywhere on the surface of the globe the Northeastern United States may expect an additional month of severe weather above the latter part of that month, an ice-building freeze the night of July 1, and another equally intense early in August.

There will be, in short, in 1937, a recurrence of the "year without summer" that made 1816 a year of misery.

But of even more immediate interest perhaps, than the date of the arrival of the "year without summer" is the time when it will be necessary to leave home.

The reason is, perhaps, a forecast of the "radio weather" for weeks to come, which took place in Leeds was followed within two hours by a funeral from the bride's home. The marriage of Miss Venetia Waterson, daughter of Mr. and Mrs. George Waterson, to the best advancement and welfare plan, quiet evenings with their books for dates far distant when the state is certain to be terrible. It all depends, both the weather and conditions of radio reception, the speakers declared, on the sun.

Herbert Jacobi Brownie, of Washington, D.C., author of the above-mentioned book, and the interesting question was raised recently at the meeting of the Pharmaceutical Association as to what amount a tea pot should hold. It was said that when a druggist goes to buy tea from different sites there are in teapots. Some would hold more and some less than a drachm. Various suggestions were made at this meeting to recommend a standard. In conclusion the decision was that it was not a subject for the association, but for the manufacturers, and it was left to them. We do not suppose that in most cases a slight difference in the size of the teapots is of any real importance. It might be argued if all the medicine glasses agree in the amounts marked on them as representing so many teapots and table-spoons, and also what does a "spoonful" of anything mean? A man with a spoonful of sugar in his coffee cups—Kingston Standard.

New Invention Will Consume Motor Fuel

Menace of Carbon-Monoxide Gas Said to be Overcome

Recent experiments in the laboratories of the Royal Society of Chemistry are said to have demonstrated the practicability of a "catalyst" designed to consume the carbon-monoxide gas produced by motor cars.

Mr. Fred Yandell Hender-

son of Yale and others have devised a system to remove the carbon monoxide from the air in houses and

from the atmosphere of the laboratory.

The device consists of an exhaust pipe containing certain chemicals which decompose the carbon monoxide.

The apparatus is said to have

consumed the carbon monoxide

gas from 100 cubic feet of air in

about five minutes.

The catalyst, which is a mixture

of iron and other metals, is

placed in a tube which is
